E-Toll Service: Via Verde

# E-TOLL SERVICE: VIA VERDE

Drive stress-free on all Portuguese motorways, including SCUT roads (originally toll-free routes now using electronic tolls), with our cars equipped with an electronic toll device (Via Verde).

## Legal requirement:

Since January 1st, 2023, all rental cars in Portugal must be equipped with an automatic toll device, and toll fees must be included in every rental agreement (Portuguese Law 84-C/2022, in line with EU Directive 2019/520).

## How it works:

- **Pick up your car:** The electronic toll device (Via Verde) is pre-installed and ready to use (Via Verde device fee €2.23\* per day, up to max. of €22.30\* per rental).
- **Drive as usual:** Toll fees are recorded automatically – no need to stop.
- **Return & settle:** Toll fees are added to your rental invoice – no further action needed.

## Billing and refunds:

- **If you use toll roads:** The fees will be charged with the invoice. Via Verde reserves the right to transmit further charges within 3 weeks after passing the toll gate, so there could be a final settlement of toll charges up to one month after the rental by SIXT Portugal.
- **If you don't use toll roads:** The Via Verde device fee will be refunded within one month after the rental. Please note that, depending on your bank, it may take up to one additional month for the refund to appear on your credit card statement.
